

“The Meath is a very special place.”

The Meath Life Enrichment Fund has been developed to assist families who may have difficulty paying for their family member to go on trips, outings and holidays because of financial difficulties.

We are all inclusive and want to give every resident the same opportunities to develop and enjoy themselves as their peers do irrespective of their financial position.

We receive fee payments that cover each person’s day to day care, which is immediately translated into staffing and household costs.

There is no obligation for the Government to provide the many and varied opportunities that exist at the Meath to help people access skills training, sports, creative or leisure pursuits.

Historically, the Meath has covered every cost including ensuring that each of our 80 residents go on holiday once a year. A care package includes a £200 payment for holiday on top of care but these days this does not go very far and certainly does not provide a week’s holiday. In this difficult economic climate it is getting harder for The Meath to pay for these non-contractual costs. In order to ensure that all our residents can live life to the full and take advantage of every opportunity we have set up a Life Enrichment Fund. Donors may like to know that their gift is directly supporting a resident enabling them to be enriched either through experiences or specialist equipment.

“The Meath is a most exceptional place and should be used as a blue print for all care homes.”

“I have so much in my life that I want to do. Before I lived at the Meath, it didn’t seem likely that I would get the chance. However, with the help and opportunities that I have now, I have even taken up sports. It’s wonderful! I have always said to myself, don’t let your disability stop you doing things – take a chance in life and have a go and now, I feel I can!” - Regan

“The positive attitude of staff, volunteers and residents makes being part of the Meath an utter joy.”

“I believe that the Meath is so uniquely special, it should be used as a blueprint for all residential care homes throughout the UK. Each person is cared for with sensitivity and a recognition of his/her individual needs, which profoundly affects the life of anyone needing care. It doesn’t feel like a care home – when you are there, it feels like you’re part of a family!” - Kate - Michael’s sister
